

My name is Susan Sloan. My husband Kevin and I have two daughters (Emily – 7th grade, Hannah – 1st grade). Our family moved to Newton in 2015, and our older daughter Emily attended Cabot and CASP starting in kindergarten prior to moving on to Day Middle School.

I adore the Cabot community, I have previously served on the PTO executive committee, I help run the Community Supper each year, and I also assist with the Cabot Fair. My husband Kevin previously served on the CASP board when Hannah was a toddler and our older daughter attended CASP.

Kevin and I have greatly appreciated the creativity and dedication of the CASP staff through the years. We brag about the high caliber of the program to friends in other towns/villages. CASP is a special program that I would like to support as much as possible. I have seen how the program supported my older daughter (who refused to do most gym games until 2nd or 3rd grade) and now Hannah, who complains when I pick her up before they are over. I am also amazed at the yearly play! I do not have the patience to even contemplate a K-2 play - and applaud the CASP educators for their patience.

I am a scientist by training and am now on the leadership team of a small biotech company. CASP has been a critical part of my support network since 2015, and I would love to give back by serving on the CASP board. My plan would be to listen and learn first, and then dive in and help CASP continue to be such a successful program for the Cabot community.
